

Chakshu Saini

Advance Software Developer at Amdocs | 8+ Years of Experience

Roorkee, Uttarakhand, India

chakshu94@gmail.com | +91-7017965773

PROFESSIONAL SUMMARY

Advance Software Developer with 8+ years of experience engineering scalable Java and Spring Boot backend systems for telecom CRM and e-commerce. Proven in microservices development, REST APIs, SOAP integrations, Kafka messaging, and system design for high-volume enterprise platforms. Owned module-level delivery on the US Cellular to T-Mobile (USCC to TMO) migration program. Recognized for mentoring developers, contributing to scalable architecture decisions, and partnering with architects, QA, and stakeholders in Agile environments.

TECHNICAL SKILLS

Core Stack: Java 8, Spring Boot, Spring Core, Spring REST, Spring JPA, Spring AOP, Spring Security, Hibernate, Microservices

Integration & Messaging: REST APIs, SOAP Web Services, Kafka, WebLogic, API Design

Architecture: System Design, Scalable Architecture, Object-Oriented Design

Databases: Oracle SQL, MySQL

Frontend: React JS, Angular JS, HTML, CSS, JavaScript

Domain: Telecom CRM, US Cellular, Vodafone Spain, USCC to TMO Program

Engineering Practices: Agile, Scrum, Unit Testing, Integration Testing, Code Optimization, Debugging, Technical Documentation

AI Tools: Cursor, GitHub Copilot, GenAI Script Automation

PROFESSIONAL EXPERIENCE

Amdocs

Advance Software Developer

Gurgaon, India

December 2021 – Present

USCC to TMO Migration Program

- Engineered Java and Spring Boot enhancements for the US Cellular (USCC) to T-Mobile (TMO) migration program within a scalable microservices-based telecom stack.
- Owned end-to-end delivery of assigned modules—developed, unit-tested, and shipped 20+ features and fixes across 15+ Agile sprints with consistent on-time completion.
- Resolved 40+ development defects across coding, integration testing, and migration cycles; delivered root-cause fixes and production-ready releases with clear technical documentation.
- Delivered mapping and validation logic per functional specifications, collaborating with analysts and developers to maintain scalable, maintainable application behavior.
- Built and sustained backend components, including data provider modules, enabling reliable data flow across application and migration workflows.
- Designed an internal GenAI migration scripts utility (Cursor, GitHub Copilot), cutting manual script effort by ~30% and accelerating team delivery.

US Cellular and Vodafone Spain

- Designed and delivered backend microservices using Java 8, Spring Boot, Spring REST, Spring JPA, Spring Security, and Hibernate for US Cellular and Vodafone Spain platforms.
- Implemented REST APIs and SOAP integrations with Kafka event flow, Oracle SQL persistence, and WebLogic deployment for scalable telecom service delivery.
- Shipped 10+ production-ready code packages by diagnosing defects, implementing fixes, and driving stable Agile releases.
- Optimized high-traffic modules and reduced response time by ~25% through targeted refactoring, performance tuning, and feature hardening.
- Mentored 3+ junior developers on architecture standards and sprint execution, improving onboarding efficiency by ~20%.

GlobalLogic

Software Engineer

Gurgaon, India

October 2020 – November 2021

Product Shopping Data Quality | Spring Boot Microservices

- Built and maintained REST APIs using Spring Boot microservices for scalable e-commerce data quality platforms.
- Engineered Spring and Hibernate backend services; optimized data access layers and improved Oracle SQL/MySQL query performance by ~20%.
- Supported React JS dashboards and reporting workflows integrated with Spring Boot REST APIs for internal data quality operations.
- Drove unit testing, integration testing, and defect resolution to deliver stable production releases across Agile sprints.

GlobalLogic
Data Analyst

Gurgaon, India
June 2017 – August 2018

Shopping Website Data Analysis

- Analyzed large-scale datasets to deliver actionable merchandising and product insights for e-commerce decision-making.
- Automated reporting pipelines using proprietary data processing languages, reducing manual reporting effort by ~35%.
- Partnered with engineering teams to integrate data outputs into platform workflows and ensure data accuracy.

Usha Microtech
Assistant Software Engineer

Faridabad, India
June 2016 – May 2017

Internal Java Application Development

- Developed and maintained Java-based internal applications supporting core business process automation.
- Resolved production defects and delivered enhancements that improved application stability and usability.

EDUCATION

Master of Technology (M.Tech), Electronics and Communication Engineering College of Technology, Pantnagar	2020 72.5%
Bachelor of Technology (B.Tech), Electronics and Communication Engineering Birla Institute of Applied Sciences, Bhimtal	2016 69%
Higher Secondary Certificate (HSC) Greenway Modern Senior Secondary School, Roorkee	2011 69%
Secondary School Certificate (SSC) Roorkee Public School, Roorkee	2009 71%

PROFESSIONAL DEVELOPMENT

- Advancing expertise in system design, microservices architecture, and scalable Java/Spring Boot backend engineering.
- Applying Cursor and GitHub Copilot to improve development speed, code quality, and delivery consistency.

ACHIEVEMENTS

- Consistently rated as a Key Performer across current and previous organizations.
- Runner-up, National Level Badminton Tournament (University Level).
- Sports Secretary, college student council.
